

DEVRAJ DUBEY

Frontend & Backend Developer

EXPERIENCE / ACADEMIC PROJECTS

❖ School Website Portal: Enhancing Education with Modern Technology

The School Website Portal project aims to revolutionize the educational experience by leveraging cutting-edge technologies such as Python, HTML, CSS, MongoDB, and the Flask web framework.

❖ Sentiment Analysis Engine for E-Commerce: Unveiling Customer Insights with AI and ML

"Sentiment Analysis Engine for E-Commerce," harnesses cutting-edge technologies such as Artificial Intelligence (AI), Machine Learning (ML), Python, Data Mining, Natural Language Processing (NLP), and JSON to provide invaluable insights into customer sentiments on e-commerce platforms.

❖ Python Web Scraping Tool: Efficiently Extracting Data from Websites

Our Python web scraping tool offers a robust solution for efficiently extracting valuable data from various websites with ease. Built using Python, this tool leverages powerful libraries like BeautifulSoup, Scrapy, or Selenium to navigate through web pages, locate desired content, and extract it in a structured format.
